

# LIFTING 3,000 Galon tank

Flying Cow Genetics - Welch, OK

Shown is Taylor, lifting with its new 100 ton all terrain crane, and just a few of the cowboys and cowgirls that work on the 2,100-acre ranch owned by Dr. Tony and Kristi Small. Their business, Flying Cow Genetics, is a family-owned business west of Welch, Oklahoma. They specialize in reproductive services for cattle and small ruminant animals. They will use this 3,000-gallon tank to store nitrogen which is used to freeze semen, store semen and embryos in nitrogen tanks, and grow in vitro fertilization (IVF) embryos in incubators. Kristi's dad, Ernie Krenz, was actually one of Jim Taylor's first customers years ago. Today, they use Jim's services because he has some of the best equipment in the industry. Also, they like to do business with people with the same views and values as they believe in.
