

# LIFTING & ROLLING 200,000 Pound Boiler

Babcock & Wilcox Company - Akron, OH

Taylor Crane & Rigging supplied supervision, manpower, and equipment to undertake the task of lifting and rolling a substantial boiler, measuring 33 feet in length, 18 feet in width, and 22 feet in height, with a weight of 200,000 pounds.

# LIFTING & ROLLING 200,000 Pound Boiler

Babcock & Wilcox Company - Akron, OH

Our experienced team carefully executed the project, ensuring the boiler was positioned onto its side and loaded onto a designated truck as directed by Chanute Manufacturing Personnel. With a strong emphasis on safety and efficiency, the entire operation was carried out without any incidents, reflecting our dedication to maintaining a secure working environment.
